## Projects

---

### GTA-6 Showcase Website

Live Demo

*React, Tailwind CSS, Framer Motion*

- Developed a visually immersive landing page inspired by GTA-6 with 3D effects and animation transitions.
- Built a fully responsive and cross-device compatible UI using Tailwind CSS.

### Movie Recommender System

GitHub Repo

*React, Node.js, Express, TMDb API*

- Designed a movie recommendation platform with trending, popular, and personalized movie sections.
- Implemented backend caching and fallback strategies for smooth API responses and faster load times.

### Weather Now App

Live Demo

*React, OpenWeather API*

- Built a modern weather app with live weather updates based on user's location or city input.
- Handled API errors gracefully and designed a clean, mobile-friendly UI.

### Personal Portfolio Website

Live Site

*React, Tailwind CSS*

- Created a personal portfolio to highlight projects, technical skills, and experience.
- Integrated GitHub for project listings and ensured seamless navigation with responsive design.
